LANGUAGES

- **Fon**: mother tongue
- **French**: fluent
- **English**: basic knowledge

SOFTWARE

- **SolidWorks**: intermediate level
- Microsoft Word and Excel
- AutoCAD: currently learning

INTERESTS

- Industrial maintenance and electrotechnics
- Renewable energy
- Technical design and CAD
- Entrepreneurship and local development

AYIGBA Maxime

INDUSTRIAL MAINTENANCE TECHNICIAN | ELECTROTECHNICS

Production equipment • Seeking an internship or a job

PROFESSIONAL PROFILE

Third-year student in the Industrial Maintenance Bachelor's degree at UNSTIM-INSTI Lokossa, holding a Technician Diploma and a vocational Baccalaureate in electrotechnics. Having gained a first experience in an agro-industrial environment at Fludor Bénin S.A., I can read electrical diagrams, use a multimeter, control three-phase motors and troubleshoot electrical faults. I have knowledge of programmable logic controllers (PLC) and an intermediate level in SolidWorks. Motivated, rigorous and able to carry out some interventions independently, I want to contribute to equipment reliability and production continuity.

TECHNICAL SKILLS

Industrial maintenance

- Preventive and corrective equipment maintenance
- Fault finding and identification of electrical faults
- Checking the operation of installations
- Taking part in production equipment maintenance operations

Electrotechnics and electrical systems

- Reading and interpreting electrical diagrams
- Electrical measurements with a multimeter
- Starting and controlling three-phase motors
- Knowledge of programmable logic controllers (PLC)

Installations and equipment

- Building electricity and industrial installations
- Photovoltaic installation and assembly
- Surveillance cameras and satellite dishes
- Oxyacetylene welding and automotive sheet metal work

WORK EXPERIENCE

Trainee worker – Industrial maintenance

Fludor Bénin S.A., Cashew Division, Cana (Zogbodomè) | 7 July – 5 August 2025

- Took part in loading operations in the production process
- Took part in cooking cashew nuts in the steam chamber
- Sorted nuts by shape in the Color Sorter section
- Took part in changing the Color Sorter program according to sorting needs
- Observed production equipment and maintenance practices in an agro-industrial environment

Trainee – Welding and technical work

Garage MONDEGNON, Lokossa | 26 December 2025 – 24 January 2026

- Practised oxyacetylene welding
- Took part in sheet metal work and automotive body straightening
- Discovered mechanical and electrical maintenance interventions
- Developed practical skills in technical work

STRENGTHS

- Teamwork and communication
- Organisation and initiative
- Project coordination and activity management
- Rigour and compliance with safety procedures
- Willingness to learn and improve

WORK EXPERIENCE (CONTINUED)

Trainee – Electrotechnics

Tech Circuit Group, Bohicon | August – September 2022 (certificate dated 9 September 2022)

- Took part in residential and industrial electrical installation work
- Installed satellite dishes and surveillance cameras
- Took part in photovoltaic assembly operations
- Practical work on starting three-phase motors

EDUCATION

2026–2027 Bachelor's in Industrial Maintenance, 3rd year (ongoing) UNSTIM-INSTI, Lokossa

2025–2026 Bachelor's in Industrial Maintenance, 2nd year UNSTIM-INSTI, Lokossa

2024–2025 Bachelor's in Industrial Maintenance, 1st year UNSTIM-INSTI, Lokossa

May–Jul. 2025 Technician Diploma (DT) in Electrotechnics, Merit (Bien) Independent candidate, MONO

2023–2024 Vocational Baccalaureate in Electrotechnics (F3), Merit (Bien) La Providence IKM, Bohicon

2022–2023 CAP (vocational aptitude certificate) La Providence IKM

2019–2020 BEPC (lower secondary school certificate) CEG de Sinwé

LEADERSHIP AND INVOLVEMENT

Co-founder and Secretary General – PTAS (PowerTech Alliance Society)

Benin | 2025 – present

- Created and organised a network of young electrotechnicians
- Drafted the statutes and internal regulations
- Coordinated meetings and collective projects
- Set up financial management tools

COMPUTER-AIDED DESIGN

- 3D modelling in SolidWorks: furniture (bench, church pew, door), ceiling fan, solar-panel street lamp, ROBOSTIM part
